Professional Summary

Software Engineer with over 1.8 years of experience designing and building scalable backend systems, distributed microservices, and cloud-native applications using Python, Java, FastAPI, Spring Boot, Docker, PostgreSQL, Redis, and AWS. Experienced in REST APIs, asynchronous programming, and event-driven architectures, with proven success in delivering high-performance production systems that support real-time workloads.

Skills

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML, CSS

Backend & Frameworks: FastAPI, Spring Boot, Django, REST APIs, Microservices, WebSockets, AsyncIO

Cloud & DevOps: AWS (Lambda, ECS, SQS, VPC, S3), Docker, Redis, PostgreSQL, MongoDB, Git, Linux

Distributed Systems: Event-Driven Architecture, Redis Pub/Sub, Redis Streams, Message Queues, Concurrent Programming

AI Technologies: LangChain, LangGraph, RAG, Vector Databases, Prompt Engineering

Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOPs, System Design

Work Experience

HashedIn by Deloitte | Software Engineer 2

Oct 2024 – Present | Gurugram

(Promoted from Software Engineer 1 in May 2026)

- Designed and developed **scalable backend microservices** for a real-time Interview Co-pilot platform using Python, FastAPI, AWS, Redis, and PostgreSQL, reducing interviewer **effort by 75%** while supporting **50+ concurrent real-time sessions**.
- Orchestrated the development of an **AI-powered autonomous Screening Agent**, reducing manual candidate screening **workload by 80%** and accelerating time-to-hire, directly impacting recruitment throughput.
- Designed horizontally scalable event-driven microservices using Redis Pub/Sub, Redis Streams, and asynchronous processing, improving communication **latency by 40%** and supporting a **3x increase** in concurrent WebSocket connections.
- Transformed internal HR operations by delivering a **RAG-driven employee support chatbot**, increasing query resolution **accuracy by 48%** and **reducing support ticket volume by 90%**, leading to **20 hours/week of operational savings**.
- Collaborated across Python, Java, C#, and TypeScript codebases within Agile teams to deliver production software across multiple enterprise applications.
- Engineered an **automated codebase intelligence platform** capable of parsing **1 million+ lines** of multi-language code, reducing **documentation effort by 90%** and accelerating onboarding time for new developers by 80%.
- Designed and implemented RESTful backend services using Spring Boot, Java, and PostgreSQL, improving service reliability and enabling seamless integration with distributed microservices.

Project Work

Realtime AI Voice Chat | Python Asyncio, FastAPI, WebSockets, LangChain, Silero VAD

[Source Code](#) | [Demo Video](#)

- Engineered an **open-source, real-time AI voice conversation system** that seamlessly integrates with existing **chatbot agents**, transforming them into highly engaging voice interfaces.
- Optimized full-duplex audio streaming pipelines to achieve **sub-second latency (1s)**, improving real-time responsiveness and reducing user drop-offs.
- Architected a modular, event-driven AI orchestration layer supporting **multi-provider STT, TTS, and LLM** integrations, reducing integration time for new providers by 80%.

CodeRunr (Remote Code Execution Engine) | FastAPI, Docker, PostgreSQL, Celery, SQLAlchemy, AWS

[Source Code](#)

- Architected an open-source, secure, scalable remote execution engine **capable of scaling to millions of submissions/day**, forming the backbone for a competitive programming platform with **99.9% system uptime**.
- Enforced enterprise-grade **sandboxing and isolation using Linux namespaces and cgroups**, mitigating critical **security risks in untrusted code execution** in untrusted code execution.
- Engineered a distributed execution pipeline leveraging **FastAPI, AWS Lambda, SQS, EC2, Auora Postgres, etc.**, improving job throughput and achieving **5-second execution time**.

Education

Ajay Kumar Garg Engineering College, Ghaziabad, U.P

B.Tech in Computer Science (Relevant Coursework: DSA, OS, DBMS, ML, System Design)

Jun 2024

CGPA: 7.9/10

Achievements

- Top Impactor Award at HashedIn by Deloitte for architecting and delivering a scalable AI system.
- Leetcode: Secured a global top 4% rank with a 1900+ rating (Knight) | [Profile](#)
- Achieved Global rank 350 out of 42K participants in Leetcode Biweekly contest 492
- Secured 513th rank globally in TCS CodeVita (out of 444K+ participants across 94 countries).
- Certifications: Fullstack Development with Django (Meta via Coursera), JavaScript Security Specialization.
